Blackdog Resource Ltd. Commences Commercial Production on Horizontal Light Oil Well in Pembina

Blackdog Resources Ltd. ("Blackdog" or "The Company") (TSXV:DOG) is pleased to announce that commercial production began on Sunday, March 13, 2011 on its non-operated horizontal light oil well in the Pembina area of Alberta. The Company has a 15% working interest in the well and in the full section of land the well was drilled on.

This well will be eligible for a 5% royalty, either on up to the first 60,000 barrels of production (net 9,000) or for 24 months.

The Company is very pleased with the faster than anticipated commencement of production, particularly given the sharp rise in oil prices over the last month, and looks forward to updating the market in due course when stabilized production rates are established.

The Company also announces it has granted stock options ("Options") to acquire an aggregate of 250,000 common shares at a price of \$0.38 per share for a period of 5 years vesting immediately to its directors, subject to regulatory and TSXV approval. Pursuant to applicable securities legislation, the Options are subject to a four month hold period. Following this grant, Blackdog has 2,291,625 Options representing 9.3% of its issued and outstanding common share capital.

About Blackdog

Blackdog Resources Ltd is a junior oil and gas company focused on the production of light oil in South East Saskatchewan and Alberta. The Company has 24,574,318 Common Shares outstanding.
