### **BLACKDOG RESOURCES LTD. ANNOUNCES UPDATE ON WOKING PROPERTY**

**Calgary, Alberta – October 19, 2009** – Blackdog Resources Ltd. (“Blackdog” or the “Company”) (TSX Venture: DOG) is pleased to provide an update on the results of its second re-worked light oil well on its property at Woking, Alberta approximately 60 km northeast of Grande Prairie.

The second well was perforated in a new interval in an existing wellbore and commenced production on October 9, 2009 at over 100 barrels of light oil per day “bopd” with a water cut of 30 %. The Company believes this well will stabilize at a rate of between 50-70 bopd with a water cut of about 60%. Currently, Blackdog has a 95.45% working interest (“W.I.”) in this well, which will revert to a 31.89% WI after payment by its partner of an approximate \$400,000 penalty. The total cost to re-work the well and bring it to production was less than \$150,000.

The Company is now earning significant cash flow from its two light oil wells on its Woking property. Its first well (6-21-75-4) has been producing at a stabilized rate of approximately 30 bopd since September 8, 2009 with a 62% water cut. Blackdog has a 58% W.I. in this well. It was brought on to production for less than \$50,000. The addition of the production from these two wells has allowed the Company to increase its daily production from approximately 50-70 barrels of oil equivalent per day (“boepd”) at the end of Q3, 2009 to between 100-125 boepd currently with over a 95% weighting in light oil.

David A. Corcoran, President of Blackdog commented, “We are delighted with the initial production results from our wells at Woking. In the rework of our second well, we perforated a new interval that has not been previously completed on the property, but is also present in several of our other wellbores. We believe we have now expanded the potential size of the Halfway pool we plan to exploit. We look forward to continuing to develop our Woking property and grow the value of Blackdog for our shareholders through prudent deployment of capital focusing on our light oil properties.”

#### **About Blackdog:**

Blackdog is an evolving junior oil and gas company headquartered in Calgary, Alberta. Blackdog's strategy is to focus on the acquisition, development and drilling of undervalued light oil properties in Alberta and South East Saskatchewan.

Blackdog currently has 16,722,989 Common Shares Outstanding.
